Vignesh Prasad

(862) 304-1515 | vprasad@stevens.edu | linkedin.com/in/vicksprasad

Education

Stevens Institute of Technology — Hoboken, NJ
M.S. Cybersecurity — *Jan 2025 – Present*

Simplilearn–IIIT Bengaluru — Bengaluru, India
Post Grad Advanced Executive Program in Cybersecurity — *Aug 2023*

BMS College of Engineering — Bengaluru, India
Electronics and Instrumentation — *Oct 2022*

Experience

Cybersecurity Intern — Mar 2024 – Dec 2024
Aujas Cybersecurity — *Bengaluru, India*

- Expanded expertise in diverse cybersecurity frameworks.
- Implemented standardized rules aligned with industry practices for financial institutions.
- Streamlined NCA ECC, NCA CSCC, and CCC rule sets for operational efficiency.
- Ensured protection of critical systems against cyber threats.

Software Intern — Jan 2024 – Mar 2024
Accenture Innovations Pvt. Ltd — *Bengaluru, India*

- Developed full-stack Java web applications using Servlets, HTML, CSS, and JavaScript.
- Conducted a case study to optimize the medical appointment booking system.
- Analyzed patient data and provided structured information to specialized physicians.

Operations Coordinator — Dec 2022 – Jun 2023
Spykke Innovations Pvt. Ltd — *Bengaluru, India*

- Managed Powerbank inventory and ensured operational readiness across Pan-India retail outlets.
- Prepared reports on functionality across malls, restaurants, theaters, and metro stations.
- Conducted tagging, detagging, and station testing for optimal performance.

Design Intern — Apr 2022 – Jul 2022
Tessolve Semiconductor Pvt. Ltd — *Bengaluru, India*

- Gained experience in PCB, system, and IC design; proficient in PERL, TCL, and Shell scripting.
- Contributed to floor planning, power planning, and clock tree synthesis for IC chips.

Engineer Intern — Dec 2019 – Jan 2020
Frauscher Sensor Technology Pvt. Ltd — *Mysore, India*

- Hands-on experience in sensor design, implementation, and performance evaluation for axle counters.

Projects

Cockpit White Box

- Developed system to prevent aircraft collisions using RF sensors and NodeMCU for data transmission.
- Monitored flight parameters (speed, altitude, direction, temperature) and transmitted to ATC for safe landing.

IoT Smart Parking System

- Designed smart parking system with spot detection and vehicle theft prevention using number recognition.

Arduino Line Follower Robot

- Built robot to follow visual lines on the floor for automated movement.

Juice Mixer

- Engineered automated juice mixer with separate water and juice tanks, solenoid valves, and a stirrer for uniform mixing.

Technical Skills

Languages: Python, VHDL, Java, C/C++, JavaScript, HTML/CSS, PERL, TCL, Shell

Frameworks/Tools: Servlets API

Extra Skills: Cybersecurity, Web Penetration Testing, Java Web Development
